

## Product Specification

### CORN GLUTEN MEAL

Feed material

---

Product name	CORN GLUTEN MEAL
Product group	Feed material
Material code	124462 MAISKLEBER (dry) 125930 MAISKLEBER 1150kg Big Bag
Definition	Dried by-product of corn wet milling process. It consists principally of corn protein, which obtained during the separation of the starch.

---

Parameters	Min.	Max.	Unit	Methods
Moisture	-	12,5	%	Drying oven (71/393/EWG)
Dry substance	87,5	-	%	Drying oven (71/393/EWG)
Crude protein (N x 6,25)	58,5	-	%	Dumas (ÖNORM EN ISO 1634-1)

#### Shelf life and storage conditions

Product shelf life is 12 months.

Store product in dry and clean area (<20°C; <60% RH) Stock should undergo regular rotation.

#### Packaging

Sold as bulk product and in Big Bags (1150 kg/unit).

#### General Information

Feed material

May contain feed acids (e.g. formic acid and its salts)

Suitable for use in GMO – free feeding stuff, certified by agroVet GmbH

Positivliste für Einzelfuttermittel der DLG: 01.05.11 Maiskleber

Feed safety database [GMP+]: 1.056 Maize gluten

Catalogue of feed materials [EU No 68/2013]: 1.2.8 Maize gluten

#### Monitoring of by-products

This by-product underlies the EU - regulations for feed materials and is controlled by a risk based monitoring program (according to GMP+ certification).

Because of its natural origin (maize) we suggest that this specified by-product underlies natural variations regarding its mycotoxines content. Under the circumstances naturally occurring variations of the mycotoxin content – whether they comply with the EU regulation – can hold a risk for specific applications as for young animals and sows.

Undesired substances like pesticides, mycotoxines, heavy metals and microbiological parameters are controlled according to our risk based monitoring program.

Test results of our monitoring analysis are available on request.
